

LATEST PROJECT

Brogborough

Client: Golder Associates

Value: £19,540

KpH were given an opportunity to price for the dismantling of redundant landfill gas recovery plant, associated power plant, oil tanks, buildings and structures.

KpH needed to react quickly to this project due to the tight time scales given by the client. KpH attended the site and put forward a detailed proposal and programme to carry out the works.

KpH were awarded the project and forwarded a set of comprehensive RAMs to carry out the works, using their own staff and machine operators. The project went smoothly according to programme and budget.

Thanet District Council

Client: County Clean Environmental

Value: £23,306

KpH were awarded the contract of the cleaning and degassing of the depot underground diesel tank and subsequent lining. The tank was over 30 years old and had no history of cleaning and therefore the sludge within the vessel was causing issues with the delivery pump and fleet of vehicles.

As this was a live depot for the council, the safe systems of work deployed for the cleaning and lining needed to be maintained to a high standard.

KpH put forward comprehensive health and safety paperwork and control procedures giving the client the confidence in the delivery of the project.

The project was a great success and has meant the client now can utilise the underground vessel for many years to come.

OTHER NEWS

Exxon Mobil Safety Assessment

KpH Environmental, **ExxonMobil** has successfully passed the re-assessment of Exxon Mobil's safety management systems. As a result KpH Environmental services has been retained on the Exxon Mobil, Distribution and Pipelines' list of approved contracts.
