

Quality Policy Statement

The scope of the company is primarily involved with specialist services to the Construction and Petro-Chemical Industries. We undertake Demolition works, Soft Strip and Enabling, Fuel Tank Cleaning and Removal, Land Remediation & Groundwork and Plant/Machinery Removal & Replacement and their associated services.

The quality policy of the Company is to maintain and improve its reputation for providing a high quality of service. The aim of the Company is to market and provide services of a high standard that will merit and earn client satisfaction in our competitive market. The Company is committed to comply with all the quality standard requirements and will seek to continually improve the effectiveness of the "Quality Management System".

The Company holds regular quality review meetings that monitor and maintain the Company's Quality Policy and Procedures in relation to the project work we undertake and have completed. The policy is assessed to ensure that it is still relevant to the Company's scope and activities as well as our current contractual requirements. The Company will ensure that all its staff are fully aware of the Company's quality policy and their duties and responsibilities to it. All personnel will receive Quality Policy training and receive regular updates and information to ensure that they adhere and comply with the Company's stated quality aims and objectives.

The Company stresses the importance of a complete quality service to all company personnel. All personnel are involved in carrying out the Quality Policy. The sections of the Quality Manual, which are relevant to each person's work, will be reviewed regularly and amended and then discussed with the employees and then incorporated into the Quality Procedures. The Quality Controller as part of the Company's quality management system will record all of the document control amendments.

The Management of the Company is committed to a policy of Quality Assurance throughout the Company's activities, by specifically ensuring that the product quality satisfies the specific contractual obligations of all our customers and complies with the Standards of Quality specified in ISO 9001:2000 (ISO 14001:2015) and also the relevant Health and Safety requirements together with any other relevant legislation and Codes of Practice which may augment these standards.

The Quality Manual and the associated Quality Procedures are approved by the undersigned and are the authoritative documents relating to Quality within the Company.
