

NEWS FROM KPH ENVIRONMENTAL

January 2020

LATEST PROJECT

Location: Westminster
Client: CBRE

Long term client, CBRE, engaged with KpH requesting the feasibility and recommended extraction of 4no. 45,000ltr Diesel Oil Tanks, from the Basement of The Palace of Westminster. After extensive planning, KpH provided a comprehensive scope of works and costs to carry out the project in line with the high security, complicated access and CBRE's programme.

With the award of the contract, KpH staff had to undergo high security screening to allow them access to the Palace and areas of work. Once this was in place, investigation and survey of the 6no. Tanks could be carried out (2 were remaining in situ). The survey determined that all the associated pipework needed to be drained and purged, along with some Tanks requiring cleaning and degassing to allow the removal.

KpH put in place a plan of works, along with detailed Health and Safety paperwork, to carry-out the cleaning and purging of the lines and Tanks, making them safe for removal. Once this was completed, CBRE's approved scaffolding company erected the working platforms and hoists to give safe access around the Tanks for Deconstruction and to remove the waste. With all the associated Tank pipework dismantled and removed, KpH utilised Plasma Cutting techniques to deconstruct the vessels to slab level. This negated the need to store gas cylinders onsite and reduced the health, safety and security risks.

Although the project had various security and logistic challenges, KpH completed the dismantling and removal works in line with the programme and handed over the space to CBRE for further works.

New Business Roles

Martine Francis joined KpH Environmental as a Customer Relations Coordinator in September 2019. Martine has over 17 years experience working in the insurance industry and is now looking forward to transferring her skills to Environmental Services. Her role will include developing relationships with existing Clients, generating new sales leads, networking and directing marketing campaigns.

OTHER NEWS

Photo of the Month is Back!

Our monthly Photo Competition returned in October 2019 and the KpH Team have been sending competitive photo entries each month. Decembers winner was Steve Nicholson with this shot, looking up through a hopper at Elmer Treatment Works.

KpH Sponsors Surrey Wildlife Trust

This year KpH Environmental are sponsoring Surrey Wildlife Trust to continue working with organisations and landowners to protect wildlife sites across the county and inspire local communities and young people to care for wildlife where they live. KpH will be providing long-term support to the Trust; volunteering for key projects in the local community and generating engagement and awareness for their environmental campaigns.

For more information about the great works carried out by the Surrey Wildlife Trust visit:

KpH Live Projects

We are currently undertaking several projects for our client Bridges Electrical Engineers, at Elmer Water Treatment Works.

Skilled Operatives have carried out the dismantling of 2 no. CO² strippers. Working from the client's scaffolding, gantries of both Tanks have been removed and using Reciprocating Saws, the Tanks have been cut into manageable sections. All waste has been removed for disposal, at a licensed facility.

Various skilled techniques and tools will continue to be used on this job, so look out for updates on LinkedIn and Twitter as the work progresses.

If you think we can assist on any current or upcoming works, please call our Environmental Division Manager, Craig Taylor, on 07814 532182.
